www.paulsoftware.dev

Motivated Software Engineering graduate from FIU, looking to contribute to team success through hard work, attention to detail and excellent organization skills. Experienced with OOP and software design patterns. Continued to learn on my own after finishing my education and am presently in the process of learning AWS, Docker, Kubernetes, and data analytics. Seeking an environment emphasizing team work and learning by doing.

Skills

- Python
- Javascript
- Node
- Express
- MongoDB
- MySQL
- MS Office
- Linux
- HTML5
- CSS3
- React
- Java
- GitHub
- Git

Experience

10/2014 – PRESENT
Adjunct Instructor/ Broward College

- Assisted with all math courses taught by the college, from Agebra all the way up to Calculus 3, Statistics, Trigonometry, Geometry, Logic, and Discrete Mathematics.
- Created a new system to help address the lack of student participation in boot-camps, resulting in attendance increasing from zero to over a thousand students a month.
- Helped students/clients improve significantly in their area of study, often resulting in immediate improvement.
- Delivered the best customer experience on campus, resulting in the best student satisfaction over all campuses.

Education

JANUARY 2011
Computer Science / Florida International University

- Pursued my passion for building and creating new things and followed my curiosity of technology, data structures, networking, relational databases, artificial intelligence, and cloud computing.
- Developed an automated graduation system for the school that interacted with the student database.
